Emergency Response - Utilizing owned assets and resource partners for expert towing, lightering, refloat operations

Wreck Removal - Developing innovative plans for complicated projects protecting clients and the environment

Members of :

Regulatory Compliance

OPA90 SMFF

Resolve Marine is cited as a best-practice example in the Federal Registrar (33CFR155.4050) meeting and exceeding all OPA90 SMFF USCG guidelines within all Captain of the Port Zones, including Hawaii and Guam.

Depots: 23 Owned/Operated by Resolve Marine
Warehouses: 4 Fully Owned/Maintained by Resolve Marine
Firefighting: 12 Municipal Fire Fighting Agreements
Assets: Owned/Maintained Assets for OPA90 Responses

China SPRO

Resolve's consortium covers approximately 85% of the ports in China via a single SPRO contract. For the ports not directly covered, Resolve can sign on behalf of the owner/operator through our agency truly making us the one call solution for China SPRO coverage. Resolve liaises closely with the IG of P&I Clubs and ITOPF in drafting contracts. This procedure ensures a ship owner is fully covered throughout the entire China coastline, while only needing to communicate with a single partner.

1-Call Alaska APC

1-Call Alaska follows a three-pillar approach to maritime emergency response, preparing for incidents, preventing them from happening, and when they do occur, responding effectively and efficiently protecting people, vessels, and the environment.

1-Call Alaska provides dedicated emergency response presence across the entire state of Alaska, including in the highly trafficked Unimak Pass. With the strategic placement of response assets, significant gaps in spill response coverage along the Great Circle Route and North in the Bering Strait is eliminated.

Safety Culture - HSEQ

Ensuring Resolve Associates, Stakeholders and the Environment are safe and protected is at the heart of every response, plan, activity. Adhering to Health, Safety, Environment and Quality (HSEQ) management initiatives, Resolve's safety culture is managed through ISO 9001, ISO 14001, ISO 18001 accreditations, training requirements, accident prevention/investigation, and improving safe work systems, procedures, and processes. Every associate at Resolve is part of HSEQ.
